About Me

Proactive and detail-oriented Fullstack Developer with experience building web applications with React and .NET APIs. I work on real enterprise management systems with SQL Server, dynamic interface development and internal process automation. University Technician in Programming (UTN). Focused on writing clean, well-structured code with concrete business impact.

Skills

Languages: JavaScript, C#, TypeScript, SQL, HTML, CSS
Frameworks: React, .Net
Databases: SQL Server.
Tools: Docker, Git.
Practices: Agile, SOLID Principles.

Experience

Sarsy S.R.L. *Buenos Aires, Argentina*

FULLSTACK DEVELOPER *March 2025 - Present*

- **Frontend:** Built React interfaces for administrative management modules (complex forms, filterable tables and data loading flows).
- **Backend:** Implemented REST APIs in .NET for system operations (record creation, business validations and access control).
- **Database:** Optimized SQL Server queries in administrative reports using stored procedures and improvements to existing queries.
- **Automation:** Developed RPA solutions using Selenium WebDriver (.NET) for previously manual administrative processes, achieving a 75% reduction in personnel required.
- **Methodology:** Participated in agile development cycles, collaborating with the project lead and clients for requirements gathering and definition.

Projects

Medical Appointment Management System *C#, ASP.NET, SQL Server*

Full CRUD for patients, doctors and appointments with schedule availability validation.
Relational database design with stored procedures for appointment queries by date and doctor.

Don Espejo Services *Javascript, React*

Website for a real services company with a two-route independent architecture and per-service semantic SEO. Dynamic metadata with React Helmet Async, responsive design with Tailwind CSS v4 and optimized build with Vite.

Pac-Man Style Game *C++, SFML*

Fully functional game with enemy AI logic, scoring system and collision detection. Real-time graphics rendering using the SFML library.

Education

Universidad Tecnológica Nacional FRGP *Buenos Aires, Argentina*

August 2023 - December 2025

University Technician in Programming
